Quick-Clean Internal Valve for MC-307 or DOT-407 Cargo Tank Model / Prop Specification Sheet

This unique Cargo Tank Model was developed by STTS for the sole purpose of training firefighters and emergency responders in the loading and unloading systems of the MC-307 & DOT-407 Cargo Tanks. Each unit is an authentic replica of the operational system found on the underside of MC-307 & DOT-407 Cargo Tanks. The operational system of this prop demonstrates the hydraulic operating system as well as the emergency remote shut-off device utilized to stop the flow of product from a distance. In addition the design of the prop allows for easy visual observations of all features including the shear section that protects the contents of the vessel from spillage in the event of an accident.

Specifications:

- 34" Long – 30" Wide – 48" Tall (Fits through most industrial doorways)
- Lightweight aluminum frame construction
- 10" foam filled tires for increased mobility at a tilt
- "Betts" Quick Clean Internal Valve
- "Betts" QRB discharge valve
- Hydraulically operations with fusible plugs and jack for easy operation
- Hydraulically operated – emergency remote shut-off device – frangible
- 3" discharge with solid cap
